

STRATEGIC INSIGHTS REPORT

Category Review: Chips & Snacks

A Comprehensive Analytics Review for Strategic Planning

Aaryan Pathak, Data Analyst

July 2026

Executive Summary

Key Assertion

The new store layout significantly boosts performance.

We recommend a full-scale rollout targeting

Mainstream Young Singles/Couples to maximize profitability.

Evidence Summary

- 15-20% sales uplift in trial stores.
- Mainstream segments spend more per bag.
- 175g is the optimal pack size anchor.

PHASE 01

Category Overview

Demographic Trends & Purchasing Behaviors

Historical Sales Trend

Category sales are remarkably stable, with the only notable outlier being store closures on Dec 25th.

Top Sales by Segment

Insight: Older Families drive the highest volume, but Young Singles/Couples represent the most consistent growth segment.

Affluence Distribution

- Mainstream (45%)
- Budget (30%)
- Premium (25%)

Key Product Insights

Top Brands

Kettle, Doritos, and Pringles lead category preference.

Ideal Size

175g packets represent the category anchor for sales.

Price Sensitivity

Mainstream customers pay 12% more per bag on average.

PHASE 02

Trial Assessment

A/B Performance Testing

Control Matching Method

Scientific Matching

Trial stores (77, 86, 88) were paired with control stores (233, 155, 237) based on Pearson correlation of pre-trial sales magnitude and trends.

Sales Revenue Performance

Trial Stores 77 and 86 saw a massive, sustained revenue spike during the layout test.

Customer Numbers Lift

Increased revenue was primarily driven by higher customer footfall in trial locations.

Strategic Roadmap

- **Scale the Success:** Roll out the trial store layout across all major Tier 1 and Tier 2 locations immediately.
- **Targeting:** Focus marketing spend on 175g premium packets for Mainstream Singles/Couples.
- **Optimization:** Tailor the layout for Store 88 format to address local demographic anomalies.
